FOR IMMEDIATE RELEASE

### **ECIA Welcomes New Member VPG Foil Resistors**

Atlanta – ECIA is pleased to announce that VPG Foil Resistors has joined the list of esteemed component manufacturer members. VPG Foil Resistors are used for applications where performance is a high priority. These solutions are successfully employed in many environments that demand precision, stability and reliability.

Yaron Kadim, Vice President, Division Head VPG Foil Resistors commented, “The ECIA does great work and is an important contributor to the electronic component industry. We are pleased to become a member and join in the efforts of driving the industry forward.”

“In spite of the challenges the industry is facing with the pandemic, ECIA continues to add to its roster of stellar companies in the component manufacturer, distributor and manufacturer’s rep supply chain,” added David Loftus, ECIA President and CEO. “We look forward to working with VPG Foil Resistors to promote the authorized channel for electronic components.”

#### **About VPG Foil Resistors**

First introduced in 1962 by physicist and VPG Foil Resistors founder, Dr. Felix Zandman, Bulk Metal® Foil technology provides exceptional performance through temperature extremes for electronic applications that demand precision, stability and reliability. VPG Foil Resistors’ portfolio of Bulk Metal® Foil products include discrete resistors and resistor networks in surface mount and through-hole configurations, precision trimming potentiometers, discrete chips for use in hybrid circuits as well as customized chip resistor networks and arrays. VPG Foil Resistors comply with military established reliability qualifications (EEE-INST-002, DLA, CECC, ESA, ER, QPL) as well as AEC-Q200, RoHs and lead free available.

VPG Foil Resistor products are offered in a variety of resistor configurations and package types to meet the diverse needs of a broad range of applications across all market segments. Contact VPG Foil Resistors at [foil@vpgsensors.com](mailto:foil@vpgsensors.com)

#### **About ECIA**

The Electronic Components Industry Association (ECIA) is made up of the leading electronic component manufacturers, their manufacturer representatives and authorized distributors. ECIA members share a common goal of promoting and improving the business environment for the authorized sale of electronic components. Comprised of a broad array of leaders and professionals representing all phases of the electronics components supply chain, ECIA is where business optimization, product authentication and industry advocacy come together. ECIA members develop industry guidelines and technical standards, as well as generate critical business intelligence.
