FOR IMMEDIATE RELEASE

**ECIA Webinar: What You Need to Know about the SCIP Database
Wednesday, August 25th | 11:00 AM Eastern | [Register Here](#)**

ATLANTA – ECIA is pleased to partner with [Assent Compliance](#) for this timely topic. Companies around the world, including those in the U.S., are now impacted by a new regulatory requirement to submit data to the “Substances of Concern In articles, as such or in complex objects (Products) (SCIP)” database. While mandatory for those in the European Union (EU), U.S. companies are facing data requests from their European customers so that they can meet their SCIP obligations. Join two of Assent’s SCIP experts, Steven Andrews and Neil Smith, as they join ECIA’s Vice President of Industry Practices Don Elario and others to explain the latest requirements and how to meet them.

“The requirement to submit data to the SCIP database went into effect this past January. If you do business in the EU at all, you must comply if your company and product are in scope,” warned Don Elario. “This webinar will provide our members with much-needed clarity on exactly what that means.”

Topics to be covered in this webinar include:

- The EU Waste Framework Directive and SCIP database.
- How SCIP is different from the REACH Regulation.
- How a U.S. company can submit information to the database.
- Update on any future enforcement activities.

For more information and to register for this informative webinar, [click here](#).

About ECIA

The Electronic Components Industry Association (ECIA) is made up of the leading electronic component manufacturers, their manufacturer representatives and authorized distributors. ECIA members share a common goal of promoting and improving the business environment for the authorized sale of electronic components. Comprised of a broad array of leaders and professionals representing all phases of the electronics components supply chain, ECIA is where business optimization, product authentication and industry advocacy come together. ECIA members develop industry guidelines and technical standards, as well as generate critical business intelligence. For more information, visit www.ecianow.org or call 678-393-9990.
